SWB511

Power module

Description

Most Wi-Fi thermostats with smart features need to be powered all the time. So it needs a constant 24V AC power source, typically called a C-wire. If you do not have a c-wire on the wall, the SWB511 can reconfigure your existing wires to power the thermostat without installing new wires throughout your home.

Main Features

- Worked with PCT513 thermostat
- Provides 24VAC power to thermostat without a C-wire
- Reconfigure your existing wires in most 3 or 4 wire heating or cooling systems
- Easy solution without needing to run new wires throughout your home
- Both professional contractors and DIY homeowners can easily install

Main Specifications

Physical Specifications	
Operating Voltage	• 24 VAC
Operating environment	• Temperature: -20 °C ~+55 °C • Humidity: ≤ 90% non-condensing
Dimension	• 64 (L) x 45(W) x15(H) mm
Weight	• 8.8 g
